Subject: Raising of Glendale Water & Power rates

I am here to complain about the Raising of Glendale Water & Power rates. I called the GW&P line and when your representative told me the rates have gone up 70% in one year I was/am livid. Where is that money going?

What I would like answered:

- Where is the raised money going to and can we get proof of expenditures?
- How can you raise the rate – and almost double it – without it being on the ballot for the residence to approve or shoot down?
- How do we change this ability of the council to raise rates without the publics feedback?
- How would I go about petitioning the council to reduce this amount?

My bill is almost \$1,000 and that is with me using about the same energy as last year.

My last bill was for \$587.85; this bill is for \$949.62. **Almost doubled in two months!**

Thank you for your time.
